I hereby inform you of my deep dissatisfaction with the atmosphere that has currently settled at the management / teachers / parents meetings.

On the parents' side, these meetings are marked by a lack of respect for the professionalism of both teachers and management, by completely inappropriate remarks, out of context and outside the agenda, and by a deep misunderstanding concerning the role of parents in the functioning of the school. Criticism of the School that should be constructive, ends up being drowned in flood and does not seem to be accompanied by proposals. This leads to completely dysfunctional procedures.

It therefore seems necessary to remind that this is a school and not a company and that, therefore, the representatives are not a "Supervisory Board" and that there is not a school "CEO" among the parents.

I inform you that I am not ready to continue this so-called cooperation in the future, unless a radical change of attitude of the parents towards what is mentioned above is felt as soon as possible.
